

The informative home and well-being special

Frau im Trend Wohnen & Wohlfühlen offers plenty of suggestions on how to turn a house or apartment into an inviting home. A place where family and guests can relax. Published six times a year, the magazine covers the entire home living spectrum: professional suggestions for kitting out all living spaces, up-to-date overviews of the furniture market and new design ideas. Aficionados' tips for celebrating with family and friends and creative ideas that are easy to replicate increase the magazine's benefits. Reports and practical solutions for typical home problems round off the concept.
